## What do you like most about this course?

- This is arguably the best class I have taken so far in the PhD program. The instructor has a keen interest in ensuring students understand the material and is very effective at teaching. He succeeds in making even the most complicated concepts understandable. For me, I will only have good memories of this course.
- This was an excellent course and I really enjoyed it. The topics here are very advanced and as a PhD student I feel lucky to have the opportunity to learn some of these advanced topics. I imagine in many other PhD programs students do not even have the opportunity to be exposed to some of these topics. I feel very prepared and confident in my knowledge of the area and thanks to the course I am as likely well versed on the subject as students at the highest ranked institutions. I also appreciate the professor's generosity to continue the course material as an independent study for the next semester.
- Working assigned problems and the flexibility in covering other topics

## What suggestions do you have to improve this course?

- None that I can think of
- I would definitely recommend this course being part of the core curriculum in our program.
- Class design is right for this time
